Station WNTC Will Introduce Many New Programs This Spring; Several Equipment and Schedule Improvements Have Been Made

by BOB MENNE

As the fall term of the campus radio station's broadcasting schedule draws to a close, an enviable record of achievement has already been realized and the prospects for the coming year show real promise. Many improvements have been made by WNTC in the past semester and it seems that many more are on their way for the Spring semester.

One of the largest advances of the past semester has been the institution of the Board of Governors' Report which is now being presented Monday evening at 9:45 p.m. This program brings to the listeners the latest actions of the Clarkson student governing body. In conjunction with this, an informal program of campus news has been integrated into the schedule. This feature, which will be broadcast on Wednesday evenings, consists of the news highlights from the sororities and fraternities as well as the major organizations of both colleges.

Due to the large student demand

for athletic coverage, the policy of WNTC is to broadcast all home events and as many away games as possible. Newly formed has been a network to provide the scores of all away contests in those cases where it is not possible to broadcast the event itself. This practice was established during the current week and is expected to be continued. It was WNTC's distinction to be the first in Potsdam to learn and publicize the results of the latest hockey games played away.

As in the past years the station has continued its "Ten till when" program on Saturday evening. This is basically a marathon disc-jockey show in that the station obliges its listeners by remaining on the air as long as there is audience response. Reports of broadcasts as late as 4:00 a.m. have been recorded, which is proof of the large enthusiasm it enjoys.

Highlighting the activities for the coming semester will be an interview type program which will have as guests many of the prom-

inent college figures. These interviews will attempt to bring the aims and view points of both faculty members and students of the college to your home radio. Tentative plans are to commence this feature within a few weeks after registration for the spring session. Also high on the list will be the Sunday afternoon broadcasting schedule which will further bring the talent of the students and the better music of our times into the limelight.

The administration branch of WNTC has been working untiringly in order to greatly improve the quality of broadcasting. Negotiations have been initiated with the major recording companies to provide the station with the latest music being released.

Improvements are continually being made in the technical broadcasting ability due to the acquisition of more modern equipment. It is expected that shortly the entire student body will be able to enjoy better reception.
